

Take Action!

City

You have an outsized influence on shaping household demand and lifestyles. Most people around the world live in cities, and urban consumption contributes greatly to climate, pollution and resource challenges. As urban stakeholders, you can help to meet citizens' needs and aspirations in sustainable and equitable ways.

Resources for you:

Resources from OneEarth Living, with partners:

- **Beacon for Sustainable Living: Cities** – find policy guidance, resources and examples on how cities are advancing sustainable living.
- **Sustainable Consumption Toolkit** – a toolkit to advance sustainable consumption, introducing key concepts and suggested initiatives and implementation strategies; created for the Urban Sustainability Directors Network.

Other resources:

- **C40 Cities Spotlight on: Sustainable Consumption** – a resource on how your city can tackle consumption-based emissions and reap rewards with useful tools, resources and examples.
- **BCIT Centre for Ecocities** – support for the evolution of ecocities worldwide through tools, metrics, expert planning and policy advice, training and other services for cities.
- **Envisioning 1.5-Degree Lifestyles: Policies for Low-Carbon Cities in 2030** – a project exploring the concept of “1.5 degree lifestyles” at the city level including in Brazil, India, Japan, South Africa and Thailand. More resources here.
