

Take Action!

Educator

You teach and inspire the next generation and empower students. You want to provide them with the insight and support they need for sustainable living.

Resources for you:

Resources from OneEarth Living, with partners:

- One Planet Saanich education materials and [student challenge](#).

Other resources:

- Sustainable Lifestyles and Education Resources including this useful [hub](#), teaching guidelines, methods, curriculum and materials created by [PERL](#) and also found on the [United Nations One Planet Network site](#).
- Bioregional's guidelines for schools for creating [One Planet Action Plans](#)
- Sign up your school for [Cool It! Climate Leadership Training](#) – [BC Sustainable Energy Association](#) or use [Cool It Resources for Parents, Teachers and Kids](#) - by the BC Sustainable Energy Association
- Video and teaching materials: [Powering the Planet: Renewable Energy](#) - Nature Lab - The Nature Conservancy - Join scientist Alex Wegmann on a Virtual Field Trip to explore a compelling question: How can we get the energy we need without harming nature?
- Online Resources for Remote Learning: [Climate and Connection Unit](#) - new from Be The Change Earth Alliance for middle and high school, with 15 values-based, solutions oriented modules aimed at online learning.
- Lesson plans from [#NatureForAll](#): a collection of curriculum from around the world on Nature; and from the [Biomimicry Institute](#).
- [The Power of Media](#) – this toolkit focuses on using different media as a key teaching and learning strategy to explore themes related to responsible living and sustainable development.
- [LearnforourPlanet](#) video series from UNESCO.
- [Sustainable Development Goals](#): resources for educators.
- [Buy, Use, Toss: A Closer Look at the Things We Buy](#) - ten fully-planned lessons by the Story of Stuff. This unit is correlated with national science and social studies standards and leads your students through an exploration of the system of producing and consuming goods that is called the materials economy.
